

§ 10.739 Packing materials and containers for shipment.

(a) *Effect on tariff shift rule.* Packing materials and containers for shipment, as defined in § 10.729 (n) of this subpart, are to be disregarded in determining whether the non-originating materials used in the production of the good undergo an applicable change in tariff classification set out in General Note 28(n), HTSUS. Accordingly, such materials and containers are not required to undergo the applicable change in tariff classification even if they are non-originating.

(b) *Effect on regional value content calculation.* Packing materials and containers for shipment, as defined in § 10.729(n) of this subpart, are to be disregarded in determining the regional value content of a good imported into the United States. Accordingly, in applying the build-down, build-up, or net cost method for determining the regional value content of a good imported into the United States, the value of such packing materials and containers for shipment (whether originating or non-originating) is disregarded and not included in AV, adjusted value, VNM, value of non-originating materials, VOM, value of originating materials, or NC, net cost of a good.

Example. Australian Producer A produces good C. Producer A ships good C to the U.S. in a shipping container which it purchased from Company B in Australia. The shipping container is originating. The value of the shipping container determined under section § 10.735(a)(2) of this subpart is \$3. Good C is subject to a regional value content requirement. The transaction value of good C is \$100, which includes the \$3 shipping container. The United States importer decides to use the build-up method, $RVC = (VOM/AV) \times 100$ (see § 10.734(c) of this subpart), in determining whether good C satisfies the regional value content requirement. In determining the AV, adjusted value, of good C imported into the U.S., paragraph (b) of this section and the definition of AV require a \$3 deduction for the value of the shipping container. Therefore, the AV is \$97 (\$100 – \$3). In addition, the value of the shipping container is disregarded and not included in the VOM, value of originating materials.

§ 10.740 Indirect materials.

An indirect material, as defined in § 10.729(h) of this subpart, will be con-

sidered to be an originating material without regard to where it is produced, and its value will be the cost registered in the accounting records of the producer of the good.

Example. Australian Producer C produces good C using non-originating material A. Producer C imports non-originating rubber gloves for use by workers in the production of good C. Good C is subject to a tariff shift requirement. As provided in § 10.730(b)(1) of this subpart and General Note 28(n), each of the non-originating materials in good C must undergo the specified change in tariff classification in order for good C to be considered originating. Although non-originating material A must undergo the applicable tariff shift in order for good C to be considered originating, the rubber gloves do not because they are indirect materials and are considered originating without regard to where they are produced.

§ 10.741 Third country transportation.

(a) *General.* A good that has undergone production necessary to qualify as an originating good under § 10.730 of this subpart will not be considered an originating good if, subsequent to that production, the good undergoes further production or any other operation outside the territories of the Parties, other than unloading, reloading, or any other operation necessary to preserve the good in good condition or to transport the good to the territory of a Party.

(b) *Documentary evidence.* An importer making a claim that a good is originating may be required to demonstrate, to CBP's satisfaction, that no further production or subsequent operation, other than permitted under paragraph (a) of this section, occurred outside the territories of the Parties. An importer may demonstrate compliance with this section by submitting documentary evidence. Such evidence may include, but is not limited to, bills of lading, airway bills, packing lists, commercial invoices, receiving and inventory records, and customs entry and exit documents.

ORIGIN VERIFICATIONS AND
DETERMINATIONS

§ 10.742 Verification and justification of claim for preferential treatment.

(a) *Verification.* A claim for preferential tariff treatment made under
